**To National Representatives of IFCC National Society Members
Representatives of IFCC Corporate Members**

The Education and Management Division (EMD) is a key resource for all members of IFCC. EMD facilitates the development of managerial skills, supports educational activities in laboratory medicine and offers critiques, advice and cutting-edge expertise on issues and problems related to laboratory management, teaching and education. EMD provides many of these educational, teaching and consultative services through its Committees.

At the end of December 2013, a vacancy arises in the Committee on "Clinical Molecular Biology Curriculum" (C-CMBC) and we are calling nominations for one Full Member position.

Individuals applying for this position should have extensive experience in the work of the Committee. The mission of the C-CMBC is to develop curriculum and hold training courses in Molecular Biology techniques. In addition, C-CMBC will develop techniques for teaching Clinical Molecular Biology in Laboratory Medicine and courses in teaching Clinical Molecular Biology.

Much of the work of all EMD committees is conducted by email, but committees meet in general once or twice per year.

All National Societies and Corporate Members are requested to encourage appropriate members to apply for this position. Applicants who are not selected as full members may be eligible for corresponding membership.

Nominations should be directly sent to the IFCC Office (silvia.cattaneo@ifcc.org) by Sunday **17 November 2013**.

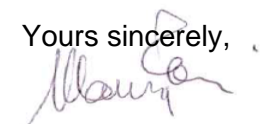

The information must include:

- Letter of support from the National Society/Company;
- Curriculum Vitae of the nominee describing the professional and/or academic career (including a list of publications), particularly highlighting the issues which could be important for the selection.
- Membership questionnaire filled in by the candidate.

Further information about the C-CMBC activities can be obtained from the Committee Chair: Prof. Michael Neumaier: michael.neumaier@medma.uni-heidelberg.de

We look forward to receiving your replies.

Yours sincerely,

Maurizio Ferrari
EMD Chair
