

8. HRVATSKI KONGRES FARMAKOLOGIJE s međunarodnim sudjelovanjem
Split 15.-18. rujna 2016.
PRELIMINARNI PROGRAM

Plenarna predavanja:

Humphrey Rang (British Pharmacological Society, University College London): „Drug discovery in a changing world“

David Busija (Tulane University, School of Medicine): “Mitochondrial mechanisms in the brain and cerebral vasculature during health and disease”

Gordan Lauc (Sveučilište u Zagrebu, Farmaceutsko-biokemijski fakultet): „Patient stratification beyond individual genes: Glycans as integrators of genes and environment“

Fulvio Ursini (University of Padova, School of Medicine): „Unraveling the mechanism of selenium catalysis in GPx4: how redox chemistry impacts on life from spermatogenesis to cell death“

Dinko Vitezić (Sveučilište u Rijeci, Medicinski fakultet, KBC Rijeka):
“Biosimilar drugs and the similarity concept”

Luka Zaputović (Sveučilište u Rijeci, Medicinski fakultet, KBC Rijeka):
„Farmakoterapija zatajivanja srca u svjetlu novih europskih smjernica“
„Pharmacotherapy of heart failure according to the new European guidelines“

Simpoziji:

1.Therapeutic drug monitoring
Laboratorijsko praćenje farmakoterapije

1. Mirza Bojić (Sveučilište u Zagrebu, Farmaceutsko-biokemijski fakultet)
Idiosinkratske reakcije: odgovori iz laboratorija na pitanja iz klinike
Idiosyncratic reactions: laboratory answers to clinical questions

2. Željko Debeljak (Sveučilište u Osijeku, Medicinski fakultet, KBC Osijek)
Klinički značaj određivanja metabolita lijekova
Clinical significance of drug metabolite profiling

3. Sanja Mandić (Sveučilište u Osijeku, Medicinski fakultet)
Metode praćenja farmakoterapije: imunokemija i masena spektrometrija
TDM methods: Immunochemistry vs Mass Spectrometry

4. Suzana Mimica-Matanović (Sveučilište u Osijeku, Medicinski fakultet, KBC Osijek)
Terapijsko praćenje liječenja biološkim lijekovima: kliničke implikacije
Therapeutic drug monitoring of biologicals: clinical implications

2.Klinička farmakologija i farmakoekonomika - je li cijena liječenja bitna?

Clinical pharmacology and pharmacoconomics - is the price of the therapy important?

1. Dinko Vitezić (Sveučilište u Rijeci, Medicinski fakultet, KBC Rijeka)

Farmakoekonomika i procjena vrijednosti lijeka

Pharmacoeconomics and drug value assessment

2. Suzana Mimica-Matanović (Sveučilište u Osijeku, Medicinski fakultet, KBC Osijek)

Specifičnosti farmakoekonomike lijekova u pedijatrijskoj populaciji

Specifics of pharmacoeconomics of drugs in the pediatric population

3. Iveta Šimić (Sveučilište u Zagrebu, Medicinski fakultet, KBC Zagreb)

Farmakoekonomika u primjeni lijekova u bolesnika s kroničnim bolestima

Pharmacoeconomics of drugs in patients with chronic diseases

4. Eduard Vrdoljak (Sveučilište u Splitu, Medicinski fakultet, KBC Split,)

Status onkološke skrbi u Hrvatskoj - kako je popraviti. Jeli onkologija skupa i u što investirati?

Position of oncology care in Croatia - how to make it better. Is oncology expensive and in which to invest?

5. Viktorija Erdeljić-Turk (Sveučilište u Zagrebu, Medicinski fakultet, KBC Zagreb)

Farmakoekonomika antimikrobnih lijekova: koja je stvarna cijena primjene antibiotika?

Pharmacoeconomics of antimicrobial drugs: What is the real price of antibiotic therapy?

3. Implementacija farmakogenomike u kliničku praksu

Implementation of pharmacogenomics in clinical practice

1.Ana Alfirevic (University of Liverpool, Institute of Translational Medicine)

Predviđanje nuspojava- statinima inducirana miotoksičnost

Prediction-ADR project and statin induced myotoxicity

2.Vita Dolzan (University of Ljubljana, School of Medicine)

Preventivno farmakogenetičko testiranje: vizija U-PGX projekta

Preemptive pharmacogenetic testing: the vision of U-PGx project

3.Nada Božina (Sveučilište u Zagrebu, Medicinski fakultet)

Integriranje farmakogenomike i farmakovigilancije – hrvatsko iskustvo

Integrating Pharmacogenomics with Pharmacovigilance – Croatian experience

4.Mario Štefanović (Sveučilište u Zagrebu, Farmaceutsko-biokemijski fakultet, KBC Zagreb)

Polimorfizmi SERT, COMT, MAOA i DAT1 u psihijatrijskih bolesnika

Polymorphisms of SERT, COMT, MAOA and DAT1 in psychiatric patients

5.Luka Bielen (Sveučilište u Zagrebu, Medicinski fakultet)

Farmakogenetika metotreksata u liječenju hematoloških neoplazija

Pharmacogenetics of methotrexate in hematological neoplasma treatment

6.Iva Klarica Domjanović (HALMED, KBC Zagreb)
Interakcija lamotrigina i valproata - uloga farmakogenetike
Lamotrigine and valproate drug interactions- the role of pharmacogenetics

4. Stabilni želučani pentadekapeptid BPC 157 – prošlost i budućnost
Stable gastric pentadecapeptide BPC 157- past and future

1.Predrag Sikirić (Sveučilište u Zagrebu, Medicinski fakultet)
Stabilni želučani pentadekapeptid BPC 157 - pogled farmakologa
Stable gastric pentadecapeptide BPC 157 from pharmacology point of view

2.Sven Seiwerth i Marko Sever (Sveučilište u Zagrebu, Medicinski fakultet)
Stabilni želučani pentadekapeptid BPC 157 - pogled patologa
Stable gastric pentadecapeptide BPC 157 from pathology point of view

5. Nove spoznaje o neurobiološkoj podlozi i liječenju PTSP-a
New insights in the neurobiology and treatment of PTSD

1.Nela Pivac (Institut Ruđer Bošković, Zagreb)
Uvod u PTSP
Introduction to PTSD

2.Tanja Jovanović (Emory University, School of Medicine)
Genetski i okolišni rizični čimbenici za endotipove povezane s PTSP-om
Genetic and Environmental Risk Factors for PTSD-related Phenotypes

3.Dora Zelena (Hungarian Academy of Sciences)
Animalni modeli PTSP-a
Animal models of PTSD

4. Suzana Uzun (Klinika za psihijatriju Vrapče, Sveučilište u Osijeku, Medicinski fakultet)
Farmakoterapija PTSP-a
Pharmacotherapy of PTSD

5. Dubravka Švob Štrac (Institut Ruđer Bošković, Zagreb)
Biomarkeri agresije u PTSP-u
Biomarkers of aggression in PTSD

6.Nikolac Perković (Institut Ruđer Bošković, Zagreb)
Biomarkeri poremećaja spavanja u PTSP-u
Biomarkers of sleep disturbances in PTSD

7. Gordana Nedić Erjavec (Institut Ruđer Bošković, Zagreb)
Serotoninski biomarkeri u simptomima PTSP-a
Serotonergic biomarkers in PTSD symptoms

6.Hrvatska agencija za lijekove i medicinske proizvode (HALMED)

Aktivnosti HALMED-a (HALMED's Activities)

1.Siniša Tomić

Iskustva HALMED-a nakon ulaska u EU

HALMED's Experiences after Accession to the EU

2.Margareta Bego

Aktivna uloga HALMED-a u centraliziranim postupcima odobravanja lijekova u EU

Active Role of HALMED in Centralised Procedures for Marketing Authorisation of Medicinal Products in the EU

3.Nikica Mirošević Skvrce

Medikacijske pogreške iz nacionalne baze nuspojava

Medication Errors from the National Adverse Reactions Database

4.Pero Draganić

Analiza potrošnje lijekova u Hrvatskoj u razdoblju od 2010. do 2014. godine

Analysis of Utilisation of Medicinal Products in Croatia in the Period from 2010 to 2014

7. Farmakologija metaboličkih aspekata kognitivnih poremećaja i šećerne bolesti

Pharmacology of metabolic aspects of cognitive impairment and diabetes mellitus

1. Jelena Osmanović Barilar (Sveučilište u Zagrebu, Medicinski fakultet)

Kognitivni poremećaji i hormonska nadomjesna terapija u nekliničkim i kliničkim istraživanjima

Cognitive impairments and hormone replacement therapy in nonclinical and clinical trials

2. Ana Knezović (Sveučilište u Zagrebu, Medicinski fakultet)

Kognitivni i metabolički poremećaji u spontano hipertenzivnih štakora

Cognitive and metabolic impairments in spontaneously hypertensive rats

3. Ovidiu Bajenaru (University of Medicine and Pharmacy, Bucharest)

Inzulinska rezistencija i mozak: utjecaj neurodegenerativnih poremećaja

Insulin resistance and the brain: impact on neurodegenerative disorders

4. Ivan Sabolić (Institut za medicinska istraživanja i medicinu rada, Zagreb)

Mogući štetni učinci novih anti-dijabetika, inhibitora suprijenosnika natrija i glukoze SGLT1 i SGLT2

Potential harmful effects of the novel anti-diabetics, inhibitors of sodium-glucose cotransporters SGLT1 and SGLT2

9. Patologije središnjeg živčanog sustava: mehanizmi i terapijske strategije

Central nervous system pathologies: mechanisms and therapeutic strategies

1.Fiorella Casamenti (University of Florence)

Polifenol oleuropein aglikon inducira autofagiju inhibicijom mTOR signalnog puta: obećavajući lijek za Alzheimerovu bolest

The polyphenol oleuropein aglycone induces autophagy through the inhibition of the mTOR pathway: a promising agent against Alzheimer's disease

2.Miranda Mladinić Pejatović (Sveučilište u Rijeci, Medicinski fakultet)

Uloga ATF3 transkripcijskog čimbenika u aktivaciji endogenih matičnih stanica i regeneraciji leđne moždine

The role of ATF3 transcription factor in endogenous spinal stem cells activation and spinal cord regeneration

3.Sonja Sučić (University of Vienna, School of Medicine)

Farmako-šaperoning transporterja za dopamin

Pharmacoco-chaperoning of dopamine transporter

4.Kristina Pilipović (Sveučilište u Rijeci, Medicinski fakultet)

Traumatska ozljeda mozga: nove spoznaje o vremenski i regionalno specifičnim procesima sekundarnog oštećenja kao potencijalnim terapijskim metama

Traumatic brain injury: new insights into time and region specific secondary damage processes as potential therapeutic targets

5.Gordana Župan (Sveučilište u Rijeci, Medicinski fakultet)

Neuroprotektivno liječenje traumatske ozljede mozga

Neuroprotective pharmacotherapy of traumatic brain injury

9. Satelitski simpozij „Marin Bulat“

Biological effects of wine and its constituents

Biološki učinci vina i njegovih sastojaka

1. Fulvio Ursini (University of Padova, School of Medicine)

What is good and what is bad for you and the advantage of ambiguity: the case of alcohol and wine

2. Ivana Mudnić (Sveučilište u Splitu, Medicinski fakultet)

Cardiovascular effects of wine „in vitro“ and „in vivo“: red vs. white

3. Mladen Boban (Sveučilište u Splitu, Medicinski fakultet)

Wine with meals: an important aspect of Mediterranean diet
